Quest		We believe the CIA should be charged with support of ODNI. The phrase "and other administrative support" should be clarified. Perhaps "and all other administrative support" would be better wording. The intent should be to provide all other services necessary, i.e., security personnel, commo, logistics (including space, services, procurement, supply, printing, real estate and rental, contracting, construction, alteration, utilities, and architectural support), training, medical, data processing, and finance activities.
